SUMMARY

Software Engineer with over 4 years of experience in web development, system migration, and process optimization. Proven ability to build and enhance systems, develop intuitive interfaces, and design scalable architectures. Delivered improvements in authentication, automated file imports, platform migrations, and new feature development across front-end and back-end projects using Angular, React, Node and Java.

SKILLS

Proficient: Java, Javascript, Typescript, React, Angular, Node.js, Spring, Rest, Microservices, GIT, Jenkins, CI/CD, Jasmine, jUnit, Jira, Communicative, Problem Solving, Emotional Intelligence, Eficient.
Intermediate: SQL, Express, Docker, Kubernets, AWS, MongoDB, Oracle, Jest, Creativity, Cognitive Flexibility.
Beginner: Python, DB2.

PROFESSIONAL EXPERIENCE

Information Systems Programmer
Stefanini Group, Brasília, BR – Remote   09/2020 to 08/2021
Core Responsibilities:

- Developed and maintained internal applications using Java, Spring and Node.js, improving business operations and system efficiency, contributing to streamlined internal processes.
- Automated test scenarios with Jasmine, jUnit, and Jest, increasing code quality and reducing defects, resulting in higher system stability.
- Analyzed and debugged software using SQL and Oracle, improving application performance and stability, which led to reduced downtime and improved service delivery.
- Integrated Agile methodologies (Scrum/Kanban) with the team, improving collaboration and productivity, speeding up feature development.
- Refactored and optimized codebases with JavaScript, TypeScript, and Java, ensuring better maintainability and scalability across applications.

Key Technologies and Tools: Java, Spring, Node.js, Jasmine, jUnit, Jest, SQL, Oracle, GIT, Jira, Agile (Scrum/Kanban)

Java Developer
ACT DIGITAL, Brasília, BR – Remote   08/2021 to Present
Core Responsibilities:

- Developed full-stack web applications using Java, Spring, Node.js, Express, Angular, React, and TypeScript, enhancing system efficiency and user experience, leading to faster user interactions and better functionality.
- Implemented data monitoring solutions with SQL, MongoDB, and AWS, improving data accuracy and

providing actionable insights, resulting in informed decision-making processes.
- Optimized CI/CD pipelines with Jenkins, Docker, and Kubernetes, reducing deployment times and increasing system reliability, which improved overall deployment efficiency.
- Contributed to the development of COOPERA and internal systems using Microservices architecture and REST APIs, enhancing scalability, security, and overall system performance.
- Collaborated in agile teams using Jira, GIT, and Agile methodologies (Scrum/Kanban), streamlining development workflows and accelerating feature delivery, ensuring on-time project completions.

Key Technologies and Tools: Java, Spring, Node.js, Express, Angular, React, TypeScript, SQL, MongoDB, AWS, Jenkins, Docker, Kubernetes, Microservices, REST APIs, GIT, Jira, CI/CD, Agile (Scrum/Kanban)

EDUCATION
Postgraduate Lato Sensu, Software Architecture, Cybersecurity, and Data Science
Pontifícia Universidade Católica de Campinas, SP, Brazil   Jan/2025 to Present
- **Relevant coursework:** Cybersecurity, Architectural Patterns, Big Data Architecture, Microservices and Microcontainer Architecture, Data Science, Scaling Businesses with Multi-Cloud Architecture, DevOps Journey, LGPD (General Data Protection Law), Designing Architecture with Security, Serverless Computing, Soft Skills for Negotiation and Decision-Making

Bachelor's in Computer Science
UniCEUB - Centro Universitário de Brasília, DF, Brazil   Jan/2019 to Jun/2022
- **Relevant coursework:** Data Structures and Algorithms, Software Engineering, Operating Systems, Computer Networks, Database Management Systems, Artificial Intelligence, Web Development, Mobile App Development, Discrete Mathematics, Computational Theory

LANGUAGES
Portuguese: Native.
English: Advanced.
